

Company Profile

TechXYZ is a **cloud-based** photo storage and sharing platform used by individuals and small businesses to store, organize, and share high-resolution images and short videos.

- Business model: Subscription-based SaaS, with free and paid tiers, hosted on AWS.
- Key assets: Customer accounts, user-uploaded photos and videos, metadata (location, tags, faces), source code repositories, and the production AWS environment.
- Users: About 50,000 global users, including a smaller segment of professional photographers who rely on TechXYZ for client deliverables.
- Regulatory concerns: Privacy and data protection obligations (e.g., handling personal data and minors' photos), plus standard cybersecurity best practices.
